

Serviacero Electroforjados

## **serviacero<sup>®</sup>** **electroforjados**

At **Serviacero Electroforjados** we are specialized in manufacturing, cutting and welding of bar gratings for light-duty and heavy duty traffic, perimeter fences, architectural elements and stairs steps for the following sectors: construction, metalmechanical, mining, hotel, naval and energy industries, among others.

We guarantee the reliability of our processes working under systems of quality and continuous improvement **ISO 9001:2015**; we are focused on meeting the needs of our customers. We are active members of the NAAMM (National Association of Architectural Metal Manufacturers) association that regulates manufacturing standards and electro-forged grid engineering designs.

We continually make investments to keep us at the forefront and expand our range of products and services.

# WE ARE MANUFACTURERS OF:

Grating  
Light Duty

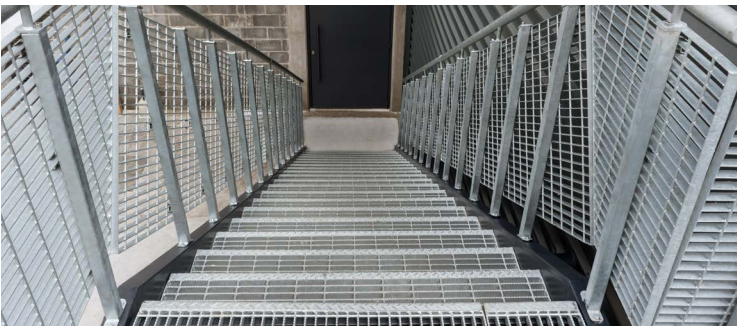

Grating  
Heavy Duty

Security  
Fencing

Architectural  
Elements

Stair Steps

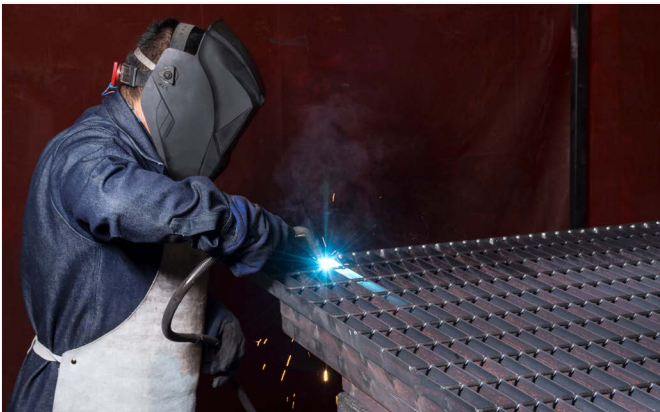

## Engineering and Design of Elements

We are specialized professionals. Our engineering team will support and guide you to find the best solution for your project, guaranteeing an adequate choice according to your specifications, verifying the compliance with the applicable standards, making tangible the vision of your projects and offering you world class products.

## Manufacturing of Special Bar Gratings

We have the possibility to manufacture panels up to 1200 mm, either with smooth or non-slip surfaces, within the spacing range of the NAAMM standard 531 and 532.

## Cutting and Welding

At Serviacero, we specialize in the manufacturing enabled bar gratings, due to the fact that we have state-of-the-art equipment with tolerances that comply with applicable standards and a staff constantly developing their skills and competencies.

## Finishes

Being backed by the best business partners, we offer a hot dip galvanized service, based on the ASTM 123 standard, and an environmentally friendly water-based paint coating. En acabados natural, pintado y galvanizado, in Surfaces Plain and Serrated.

**We have extensive inventories**

**We deliver throughout the republic**

**WE ARE MANUFACTURERS**

  
**NAAMM**  
National Association of  
Architectural Metal Manufacturers

The most complete group  
in integral steel solutions  
in the country

# serviacero®

**serviacero®**  
especiales

Dedicated to the commercialization and processing of bars and plates of alloy steels, aluminums, stainless steels, dimensional measuring equipment and engineering plastics.

**serviacero®**  
electroforjados

Manufacturing and enabling bar gratings for light-duty and heavy duty traffic, perimeter fences and architectural elements.

**serviacero®**  
WORTHINGTON

Dedicated to the processing and commercialization of steels and flat aluminum, for the automotive industry, heavy equipment, electronics and appliance amongst others.

**serviacero®**  
comercial

We specialize in the processing and commercialization of carbon steel for the metalworking industry, equipment manufacturing and construction industries.

**serviacero®**  
componentes

We specialize in the manufacture of metal components for the industry, through cutting, bending, machining, welding and painting processes.

**serviacero®**  
tubulares

Dedicated to manufacture and production of mechanical tubes for the automotive, home appliance, greenhouse and manufacturing industries.

**serviacero®**  
ORBIS

We design and manufacture solutions of packaging products includes racks, containers, baskets, dollies, pin pallets and assembly for the industry.
